NUMBERLINE SECURITY

WORKSHOP DATASHEET

CUSTOMER IDENTITY & ACCESS MANAGEMENT · POWERED BY ORY

CIAM Workshop Series

À la carte 90-minute workshops for Consumer Identity & Access Management

OVERVIEW

Login friction costs conversions.

Legacy identity costs keep climbing.

And migration feels too risky to start.

That's where we come in: Numberline brings a Zero Trust methodology and hands-on identity experience to help teams move from concept to execution faster, with Ory providing the modern identity platform foundation.

Each focused 90-minute module can be run on its own or combined into a customized four-session day, onsite or remote.

6	4	2
90-MINUTE WORKSHOPS	WORKSHOPS = 1 FULL DAY	DELIVERY MODES ONSITE / REMOTE

ENGAGEMENT PATH

Workshops map to four phases — pick any combination or run them in sequence.

PHASE 01	PHASE 02	PHASE 03	PHASE 04
Assess	**Design**	**Build**	**Launch**
Pain points • Current state	Architecture • Use cases	Configuration • Integration	Migration • Cutover

WORKSHOP PORTFOLIO

Each 90-minute workshop stands alone or combines into a four-session engagement.

WORKSHOP 01 · Assess phase

Deep Dive: Pain Points & Current State

Inventory current IdP/CIAM tooling and capture friction, fraud exposure, cost drivers, and compliance needs.

WORKSHOP 02 · Design phase

Ory Architecture & Design

Define the Ory deployment approach **(managed or self-hosted),** identity schema and authorization model.

WORKSHOP 03 · Design phase

Use Case Design & Review

Map priority business journeys to self-service flows and secure business sign-off on the implementation backlog.

WORKSHOP 04 · Build phase

Configuration & Implementation Planning

Shape identity schemas, OAuth2 clients, permission models, and the configuration-as-code blueprint.

WORKSHOP 05 · Build phase

Application Integration

Plan SDK usage, pre-built vs. custom login UI, API edge protection, enterprise SSO and rollout approach.

WORKSHOP 06 · Launch phase

Migration & Cutover Planning

Prepare bulk identity migration, coexistence, cutover sequencing, success criteria, and rollback steps.

SAMPLE FULL-DAY BUNDLES

Example four-workshop combinations, tailored to the client's architecture, priorities, and maturity.

BUNDLE A

CIAM Foundations

Best for teams defining their CIAM strategy

01 Pain points & current state
02 Architecture & design
03 Use case design & review
04 Configuration & implementation

BUNDLE B

Build & Cutover

Best for teams ready to implement

01 Architecture & design
02 Configuration & implementation
03 Application integration
04 Migration & cutover

BUNDLE C

Business-Led Rollout

Best for product- and business-driven programs

01 Pain points & current state
02 Use case design & review
03 Application integration
04 Migration & cutover

WHO SHOULD ATTEND

- CISO & IAM leadership
- IAM / security architects
- Platform engineers
- Engineering leads & developers; building customer facing apps
- Digital, product and business owners
- Fraud and risk teams
- Compliance teams

CLIENT OUTCOMES

✓ A shared view of current CIAM pain points and priorities
✓ A practical Ory-aligned architecture and delivery approach
✓ A prioritized backlog for implementation, migration, and rollout

DELIVERABLES

- Workshop readout with findings and recommendations
- Architecture and use-case notes tailored to the client
- Prioritized next-step roadmap for CIAM modernization

NOT SURE WHERE TO START?

Let's plan it together

Tell us where you are today and we'll set up a free 30-minute planning call to pick the right workshops for your team.
